DETAILED ACTION

Examiner's Statement of Reason for Allowance

Claims 1-36 are allowable over the prior art of records.

The following is an Examiner's statement of reasons for the indication of allowable subject matter: Claims 1, 11, 19, and 27 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts.

The reason for allowance for claims 1 and 27 is the inclusion of filtering said plurality of fault data to obtain core of fault data and querying said data network to generate additional fault data different from said plurality of fault data when said core of fault data is insufficient to identify faults in conjunction with the rest of the limitation set forth in the claim.

The reason for allowance for claim 11 is the inclusion of filtering said plurality of fault data to eliminate extraneous data down to a core of fault data and querying said data network to generate additional fault data different from said plurality of fault data when said core of fault data is insufficient to identify faults in conjunction with the rest of the limitation set forth in the claim.

The reason for allowance for claim 19 is the inclusion of filtering said plurality of fault data and querying said plurality of subnets to generate additional fault data different from said plurality of fault data when said plurality of fault data is insufficient to identify faults in conjunction with the rest of the limitation set forth in the claim.

The remaining claims, not specifically mentioned, are allowed because they are dependent upon one of the claim mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
